MAP DETAILS

Map sheet number ¹	Map sheet name ¹	Projection: (VicGrid94/MGA or Lat/Long) ²	Co-ordinates ²	Current EVC mapping code ³	Proposed EVC mapping code ³	Your map label ⁴	Comments

- 1 Find the map name and number on the Biodiversity Interactive Map/Layers/Graticules & Indexes/Published Map Indexes/'1:100,000 GA Maps' or '1:25,000 Standard Maps'.
- 2 Hold the cursor over the centre of the polygon or area of interest. Look to the bottom of the screen and choose a 'projection' and the corresponding 'co-ordinates' for your location.
- 3 Click on  next to map-group folder (e.g. '2005 EVC') then click on specific area of map to bring up details of the vegetation class, including the 'EVC code', for that area.
- 4 Add a unique 'map label' to identify your issues on the copy of the map product.

EVC mapping feedback information sheet – notes

Add your supporting evidence for the proposed map edits below. Don't forget to include the following information:

Structure of the vegetation; **Floristics** of the vegetation; **Soils** and or **Geology**; **Aspect** of the site; **Position in the landscape** (ridge, hill, gully, near creek, soak, floodplain, dune). Other factors you consider may be important in determining the vegetation composition at the site which may include **Landuse** and **Altered Terrain**.
